In minigames, part-time jobs within "The Hero," options appear when your partner expects an ejaculation is coming and you can plead for them to "come outside."

Safe Days and Ovulating Days

If you lose your virginity, you will become able to freely switch between safe days and ovulating days from the dormitory toilet.

If you go through an erotic event on an ovulating day rather than a safe day, you'll earn more Ero-Experience, but the risk of getting the special abnormal condition "pregnancy" will increase.

That's where "Extravaginal Negotiation" can be used to avoid pregnancy.

*There is an item called the "Love Source," which drops from bosses and is found as a casino item.

The "Love Thesaurus" is an item which can increase "Ero-Experience" just by using it.

If you'd like to beat the game while keeping virginity, use it.

If Pregnancy Occurs...

If you get pregnant, you'll be in a special abnormal condition, where all of your stats will drop.

You must sleep in the employee dormitory bed to get rid of this condition.

Erotic Status and Extravaginal Negotiation Success/Failure

Erotic status has an effect on the success/failure rate of Extravaginal Negotiation.

You can learn about erotic status in the Message Window.

Virgin ... When it's the first time, you'll forcibly be creampie'd, but you won't get pregnant.

Curious ... Extravaginal negotiation will definitely succeed.

Horny ... 50% rate of failure.

Lusty ... Will definitely fail, and the character shows a state of confusion.

Sex-Crazed ... Will definitely fail, and the character shows a state of happiness.

*Once you've unlocked "Sex-Crazed," with the item "Love-Flip," you can freely change your erotic status, and can also fix it.
