

"The Hero" System Explanation #7 "Employee Dormitory"

The Dormitory of Wall Post

The dormitory of Wall Post, which serves as lodging, has various functions related to erotic events.

Toilet

You can view scenes of the heroines using the toilet.

Also, if you've experienced **<u> losing your virginity from an event of some kind, you can freely choose between "Safe Day" and "Ovulating Day" from the dormitory toilet. </u>**

Safe Day

You can have sex with no risk of "pregnancy," a special condition that significantly reduces your status. However, the amount of erotic experience points gained is low.

Ovulating Day

There is a risk of "pregnancy." Depending on your erotic condition, you will almost certainly get pregnant. The amount of erotic experience points gained is high.

*If you engage in battle even 1 time after receiving an internal ejaculation on an Ovulating Day, "pregnancy" is sure to occur.

Shower

Under normal conditions, there will be everyday scenes where the heroines enjoy a shower.

In the event of receiving an internal ejaculation on an Ovulating Day, there will be maniac-scenes where the heroines wash out semen from them, sadly and regretfully remembering the situation with the person that did it to them.

Also, by taking a shower, you can avoid "childbirth."

Bed

The function of the bed changes according to the situation and condition progress at the time of use.

*In "The Hero," when you return to town, you'll completely recover, so the bed isn't meant to be used to recover physical strength.

① Sleep After Masturbating

This option appears after you've experienced an erotic event at least 1 time.

Remembering a recent event, you can enjoy the heroines secretly taking care of their sexual urges.

② Hold Off Masturbating and Sleep

This option appears after you've unlocked "Naked Prowl" through erotic status level-up bonuses. You can play an erotic minigame.

③ Sleep

This option appears during the abnormal status of "pregnancy."

What happens is... a secret.
