

This will be a continuation from last time of the summary article for "The Hero."

This time, I'd like to introduce various erotic systems, the core of erotic RPGS, of "The Hero," in an easy-to-understand manner.

Also, I will attach the sample event CG at the end, as promised (´▽`)

着せ替えシステム

In "The Hero," depending on the progress of the story, events, etc., you can obtain various costumes for each character.

As hairstyles and costumes can be individually chosen, various combinations can be enjoyed.

And, what now!? These outfits will not only be reflected during conversations and in the status screen, but will also be thoroughly reflected in HCGs during events!

Because of this, the amount of differences in each of the CGs is crazy...

Wall Post Uniform + Standard Hairstyle

Magic School Uniform + Stylish Hairstyle

So, when you're playing, freely choose your favorite costume with which to play (´▽`)

なんかちょっとムラムラするかも...

Erotic Status is a screen in which erotic levels and "erotic experience points" can be managed, as erotic experiences for each character are quantified and stored.

■Erotic Experience Points

Erotic experience points are like experience points earned in battle, but the erotic version.

It's a mechanic where the points increase every time you have an erotic experience, and your erotic level will go up after a certain amount is accumulated.

More experience points during 1 erotic experience can be earned on an "ovulating day."

■Erotic Level

Erotic levels are like level for battle, but the erotic version.

As your erotic level rises, skills and abilities will be learned, and special items can be obtained.

■Status Voice

During erotic status, the heroines will tell you themselves, with voices, about their current condition!

Because erotic status in "The Hero" incorporates many play elements, I think you can play quite practically just using erotic status (´▽`)

Extravaginal Negotiation

In "The Hero," events in town are mainly prostitution events and happening events.

At that time, as shown in the image, if the heroine doesn't want a creampie, extravaginal negotiation can take place.

The success of extravaginal negotiation depends on the previously introduced "heroine condition," which the heroines will tell you about via voice and messages.

There are 5 stages to the heroine's condition, from Virgin to Sex-Crazed, and as they approach Sex-Crazed, negotiations fail more easily, and no matter how much they refuse, they'll end up being creampie'd over and over (´▽`)

Toilet

You can switch between safe days and ovulating days in the toilet of Wall Post's employee dormitory, where Aster is staying.

Safe Day Gain less erotic experience, but you can have sex without risk of getting pregnant.

Ovulating Day Higher risk of getting pregnant, but gain more erotic experience.

In other words, the combination of the heroine's erotic status condition and whether it's a safe day or ovulating day will alter the chance of pregnancy when a creampie is received.

(Especially on ovulating days, there are conditions where pregnancy is certain, so there is a high probability that pregnancy will occur.)

That's about it for today, what did you think?

In "The Hero," we're especially putting effort into these erotic events in town, so there are some systems in production that we haven't managed to introduce yet.

As soon as they're done, we'll formally introduce them.

I plan to make the next summary article an easy-to-understand summary about other systems.
