

Release of Commemorative Illustration for breaking 40,000 Followers on Ci-en

Actually, we had reached 40,000 people last month, but as we weren't ready in time, the release will be today. We are sorry.....

As a result thinking what kind of illustration would be good to express our thanks to everyone..... we came to the conclusion that, as expected, a rape picture is best!

That being our official stance, actually, we had received a request on pixiv, so while responding to the request, I thought about making it into a commemorative illustration.

What came as the request was

"Koyori, caught by Nurikabe and limbs restrained, eyes white and unconscious, continually raped until she dies."

Well then, thank you all very much for 40,000 followers.

We will do our best in our circle activities in order to respond to future requests, so please give Circle Poison your future support.
