The crystal inside stores the mysterious energy like a battery.
It slowly replenishes on it's own.

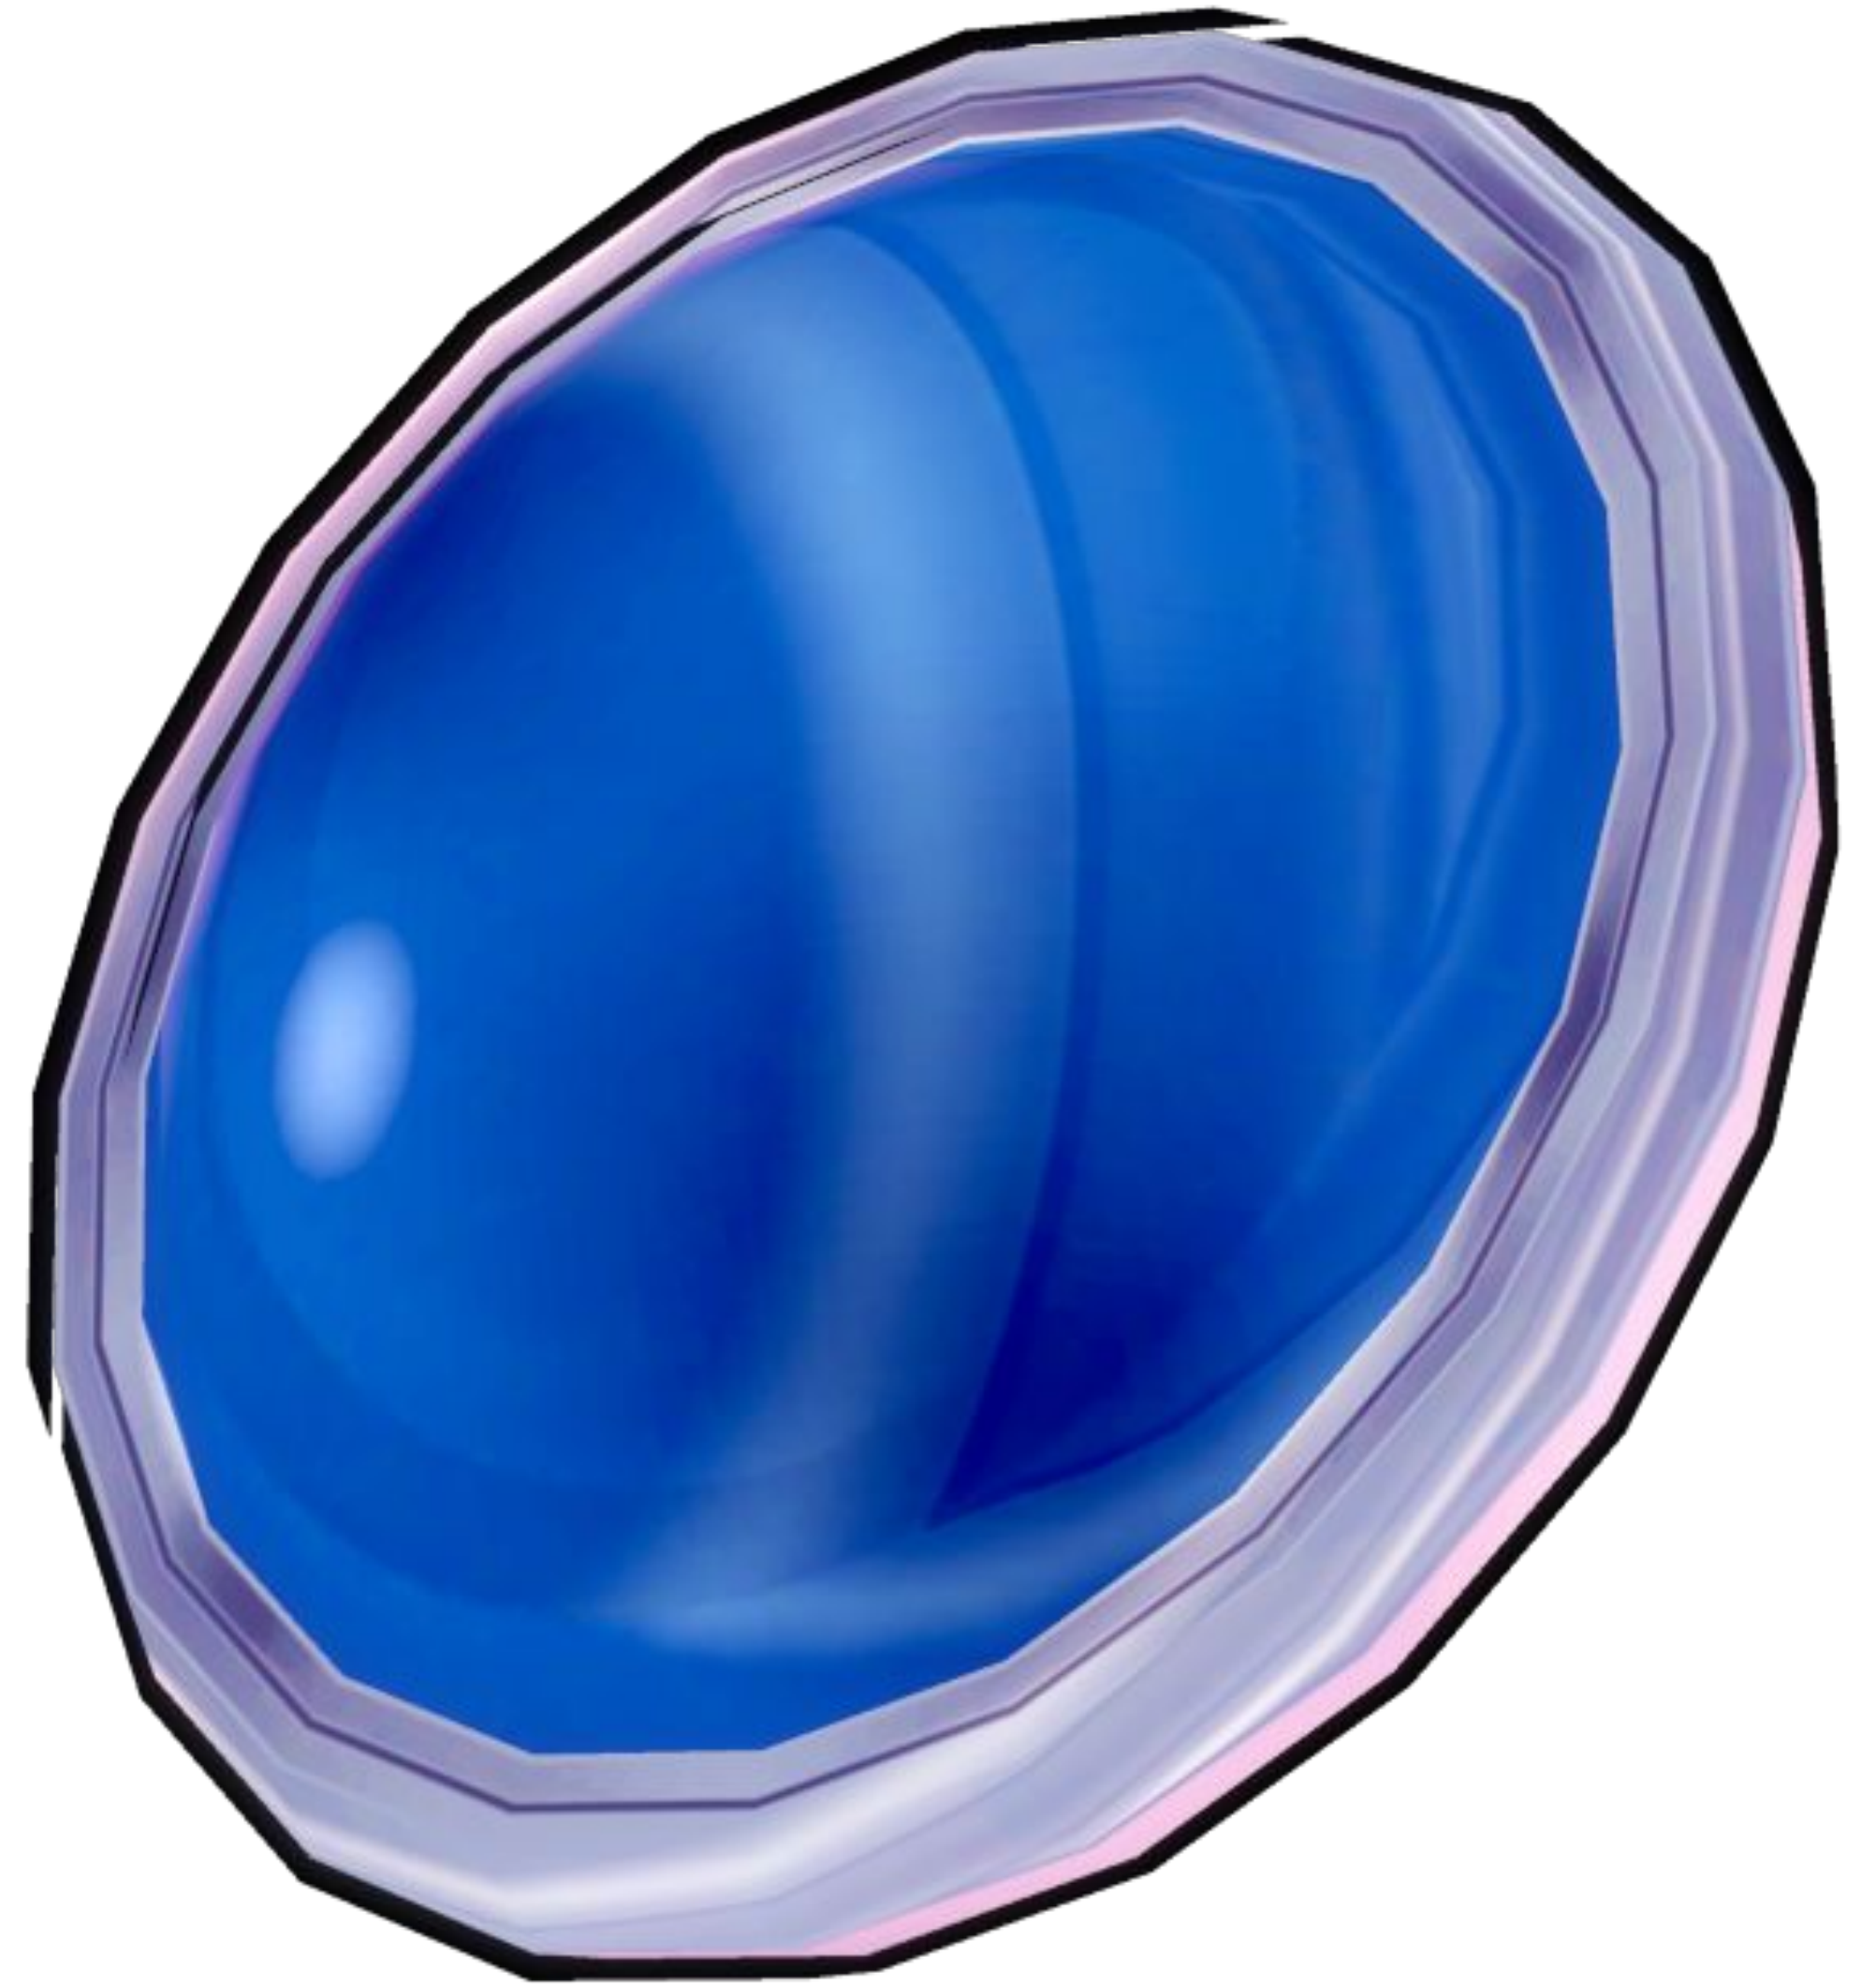

The crystal's color changes based on the Energy level.

Blue = Fully charged

Yellow = Limited energy

Red = Out of energy or damaged

No color = Energy is drained out or Device isn't working

Risa's Energy Core is placed close to her heart.

Energy Core must always be in contact with the wearer, otherwise the effect disappears

Energy automatically replenishes after some time (unless damaged)

Risa's unique talent allows her to have the core fused with her body - it can't be separated

Other Valkyries must be careful not to drop the core when fighting

THE COMBATANTS

Combatants utilize mysterious dark energy similar to Valkyries.
They don't need battery, their cells consume the energy biologically.
They are stronger than average human.

Combatants used to be normal people who fell victim to brainwashing.
The easiest to brainwash are the ones with the strongest urges and frustration.

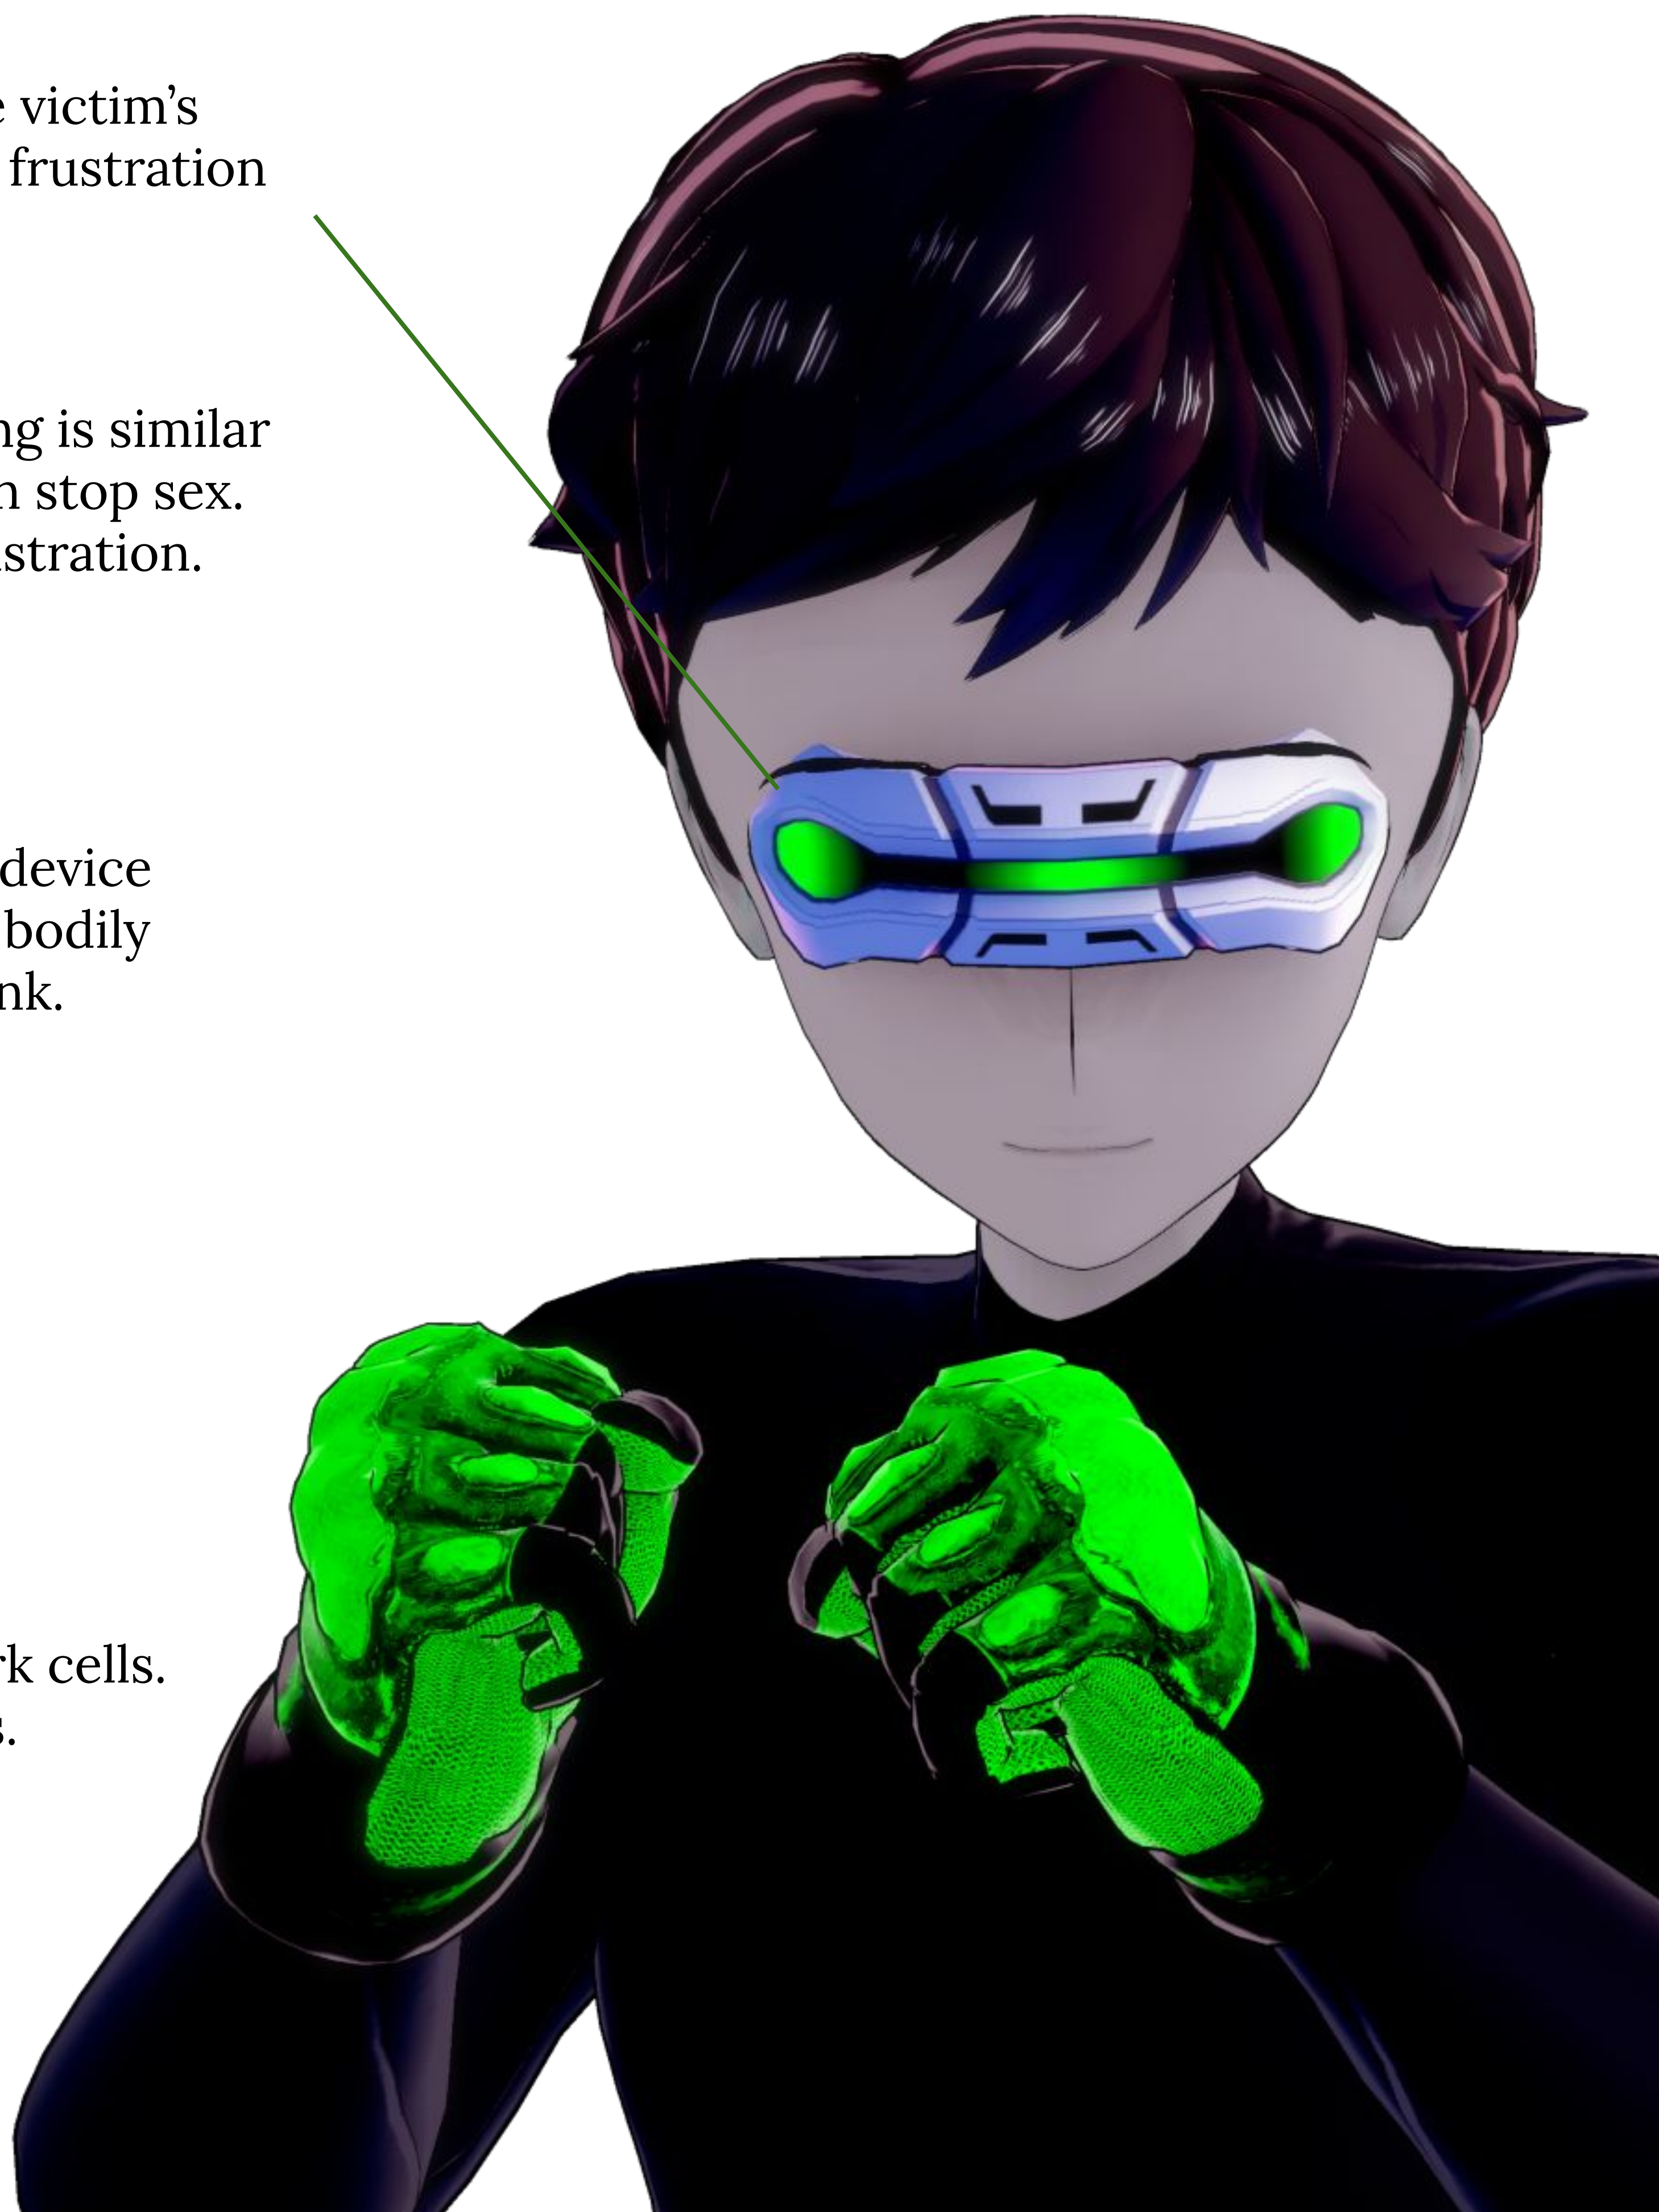

Brainwashing device feeds on the victim's
biological frustration, mostly sexual frustration

Feeling of accepting the brainwashing is similar
to being granted wish of having non stop sex.
It promises satisfaction to the frustration.

However, instead of satisfaction, the device
enhances thirst for pheromones and bodily
fluids, making them unable to think.

Successful brainwashing inserts
dark energy into the victim's body

The dark energy converts body cells into dark cells.
As a result, the skin and blood darkens.
Bodily fluids become toxic.

The device is very addictive.
The frustration grows if it is not equipped.

Their saliva has strong hypnotic effect with aphrodisiac and paralysis effect.

It can numb the brain and paralyse whole body of the victim for some time.

The combatants use their saliva like venom to hunt their prey

After that they satisfy their sexual urges or kidnap the women for later use.

The dark cells feed on women pheromones. The more they consume, the stronger they grow.

For Valkyries, the effect of the saliva is much weaker.
But it still paralyses their mouth enough so they can't bite.
It's very difficult to fight back while being licked, even for Valkyrie.

More importantly, the combatants can extract the Energy from Valkyrie's bodily fluids.
Resulting in sucking and draining the Valkyrie's energy from her body.
Although they can also extract it from sweat, much more energy is mixed in the saliva.
